## ***KCIA TENANT ADVISORY***

**DATE:** June 23, 2010

**TO:** King County International Airport Tenants  
Distributed by e-mail and fax

**FROM:** Robert I. Burke AAE, Airport Director

**SUBJECT:** Taxiway Alpha Rehabilitation Project Update

The Federal Aviation Administration (FAA) has recently informed the Airport that funding for Phase I of the Rehabilitation of Taxiway Alpha is not available this construction season. Based on this, the Airport has postponed the project for 2010.

FAA officials have indicated that funding may become available later this year, but not in time to perform any components of the project. Should this occur, the Airport will rebid the project for the 2011 construction season.

Rehabilitation of Taxiway Alpha involves replacement and repair of concrete and asphalt pavements, storm drainage, signage and lighting improvements estimated at \$22 Million, ninety-five percent of which is eligible for federal funding.

In the interim, the Airport will be scheduling routine maintenance including crack sealing, concrete repairs and painting to maintain the integrity of the taxiway facility. Any required closures will be coordinated with users in advance to limit operational impacts.

We will continue to keep you informed of any developments regarding this project. If you have any questions please contact Chris Hall in Airport Operations at (206) 296-7458.
